Big Science in Korea

- PLS - Light Source:	1988 – 1994
- Hanaro - Research Reactor:	1988 - 1994
- KSTAR - Fusion Tokamak:	1996 - 2004
- KOMAC - Proton Linac :	2002 - 2008

R&D Budget in Korea

Types of R&D Policy

PLS Overview

- **In 1987, POSTECH, a newly established university, proposed to construct a synchrotron light source on its campus:**
 - President H. Kim (accelerator physicist) and Dr. Y. Cho (ANL)
 - Y. Cho prepared the preliminary design report for PLS/PAL.
- **PLS is a 3rd generation synchrotron radiation source:**
 - 2 GeV injector linac and storage ring with upgrade option to 2.5-GeV.
- **Construction Project: April 1988 ~ December 1994**
 - **Funded by POSCO (60%) & Government (40%)**
- **Operation: funded by Government (80%) & POSCO (20%)**

Aerial View of PAL

LINAC

Gallery and Tunnel

Parameters

Beam energy (GeV)	2.5
No. of accelerating columns	44
Frequency (MHz)	2,856
Number of klystrons	12
Klystron power (MW)	80
SLED Gain	1.6
Total length (m)	~160

Storage Ring

Tunnel

Parameters

Beam Energy (GeV)	2.5
Emittance (nm-rad)	12.1
Beam Lifetime (Hours)	20
(@ 170mA)	
Number of Bunches	400
Beam Current (mA)	170

Hanaro Overview

Research Nuclear Reactor

- 30-MW open-tank-in-pool type
- 20% $\text{U}_3\text{Si-Al}$ Fuel

National users' facility

- Intense neutron source for neutron science
- Medical & industrial application of Radioisotopes

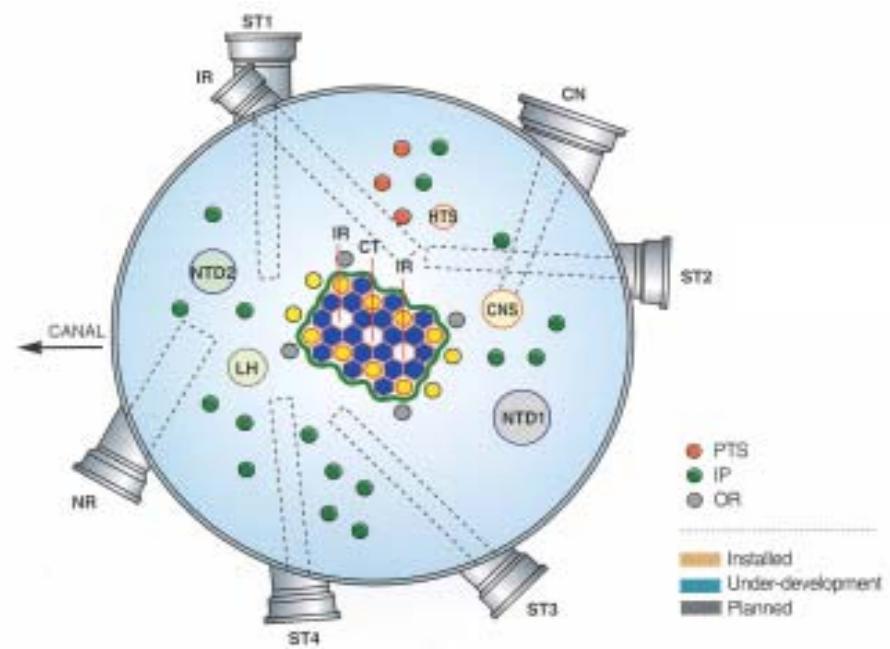

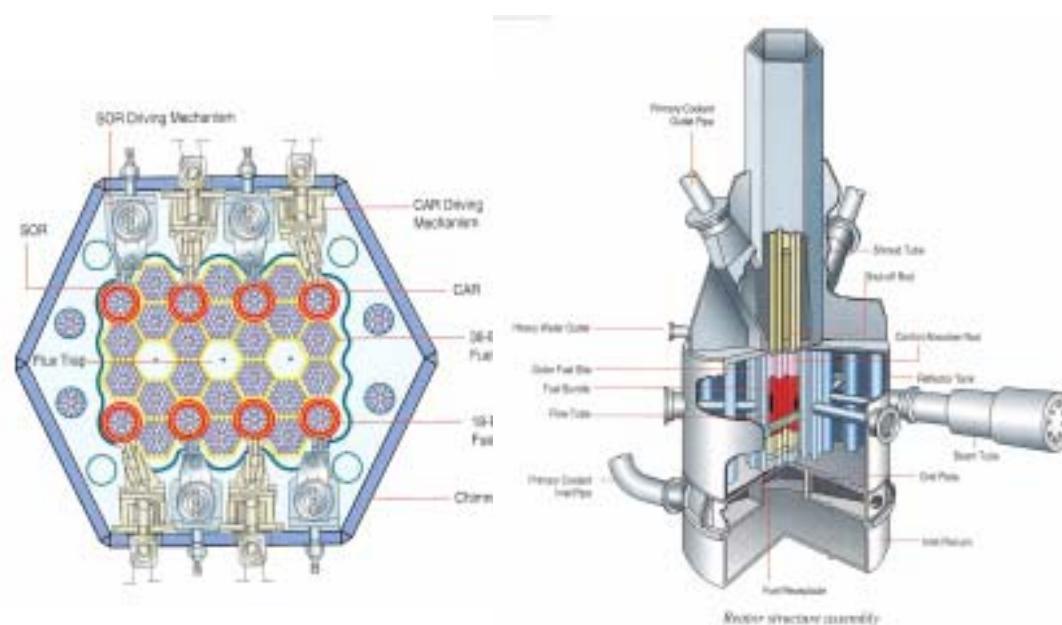

Construction period: Feb. 1988 ~ Dec. 1994

First Criticality Achieved: Feb. 1995

Construction & Operation:

Korea Atomic Energy Research Institute (KAERI)

Hanaro Reactor

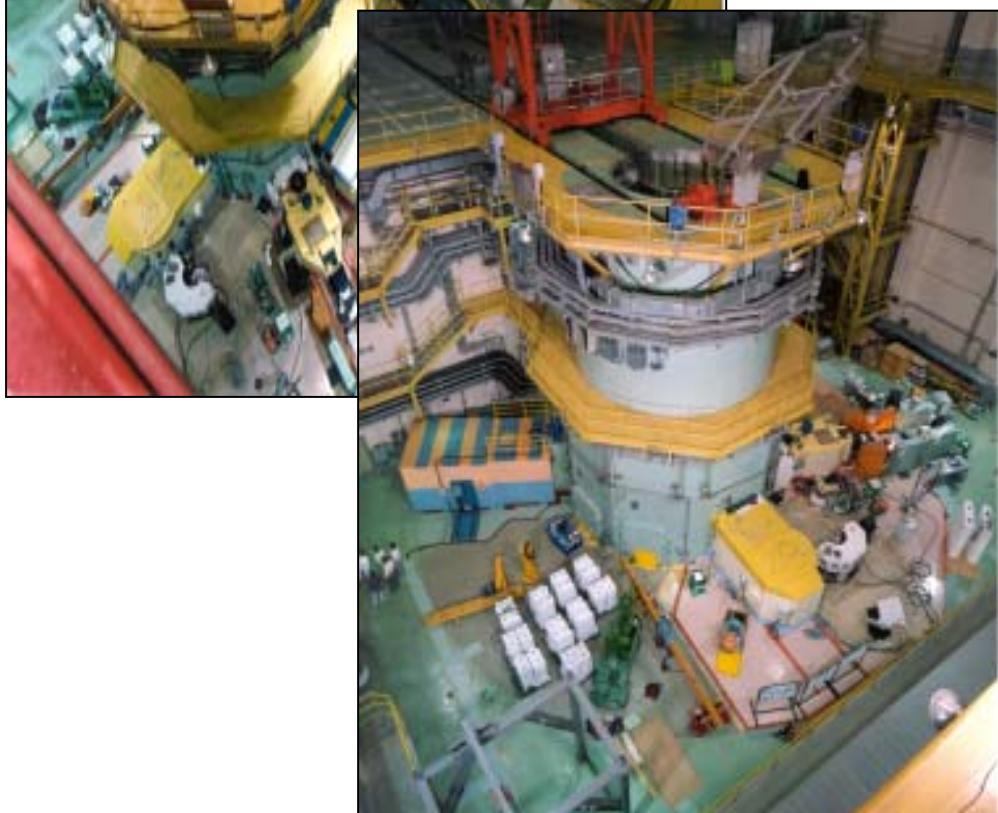

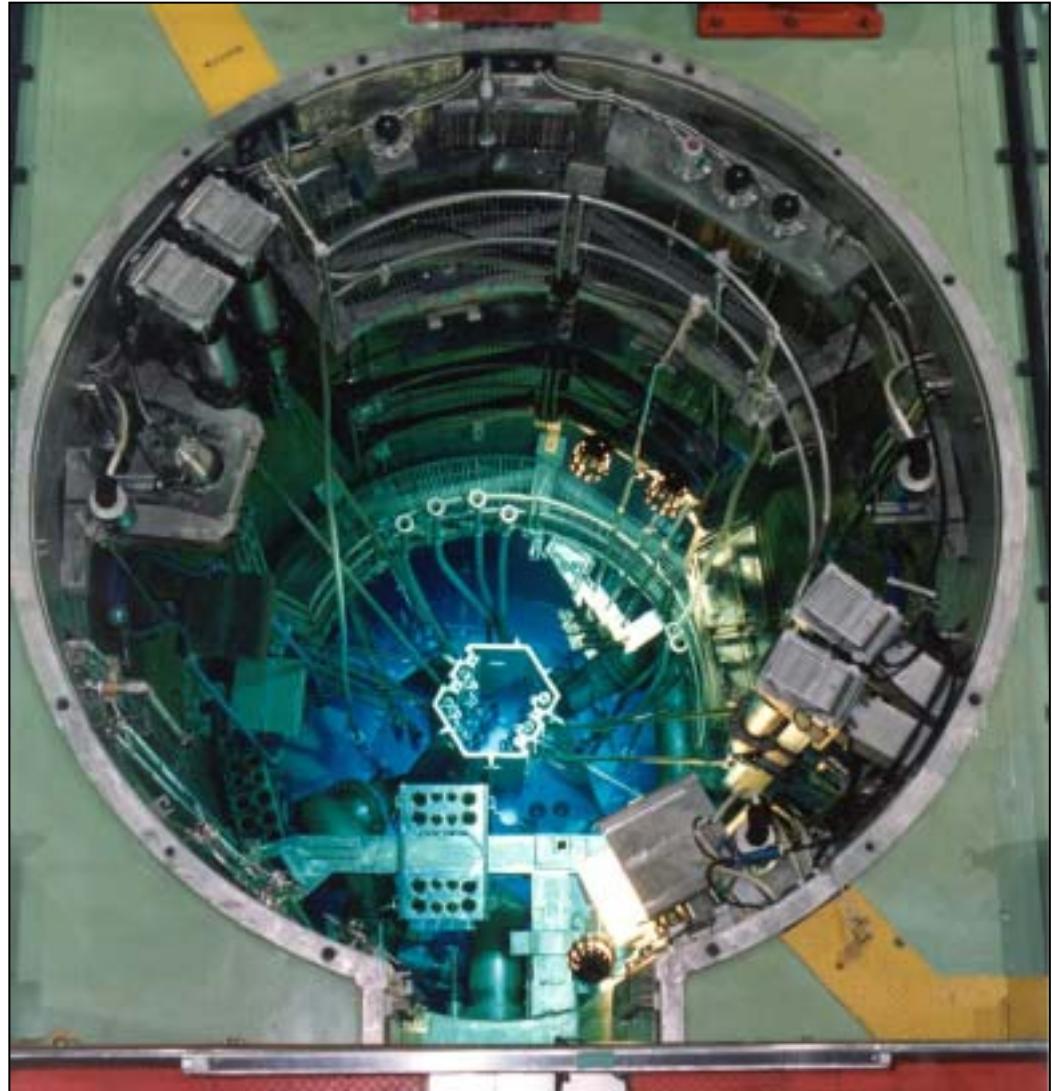

Horizontal Experimental Tubes

- ST1 : Polarized Neutron Spectrometer
- ST2 : High Resolution Powder Diffractometer / Four Circle Diffractometer
- ST3 : Neutron Reflectometer / Medium Resolution Powder Diffractometer
- ST4 : Triple Axis Spectrometer
- CN : Small Angle Neutron Spectrometer
- IR : Boron Neutron Capture Therapy Facility
- NR : Neutron Radiography Facility

Vertical Experimental Holes

- IR, CT : Capsule Irradiation Facility
- LH : Fuel Test Loop
- OR : Capsule Irradiation / RI Production
- IP : RI Production
- HTS : Hydraulic Transfer System for RI Production
- PTS : Pneumatic Transfer System for Neutron Activation Analysis
- NTD : Neutron Transmutation Doping of Silicon
- CNS : Cold Neutron Research Facility

Hanaro Reactor

KSTAR Overview

Fusion Research Tokamak

- All Super-conducting magnets
- Steady-state capable tokamak with a major radius of 1.8 m

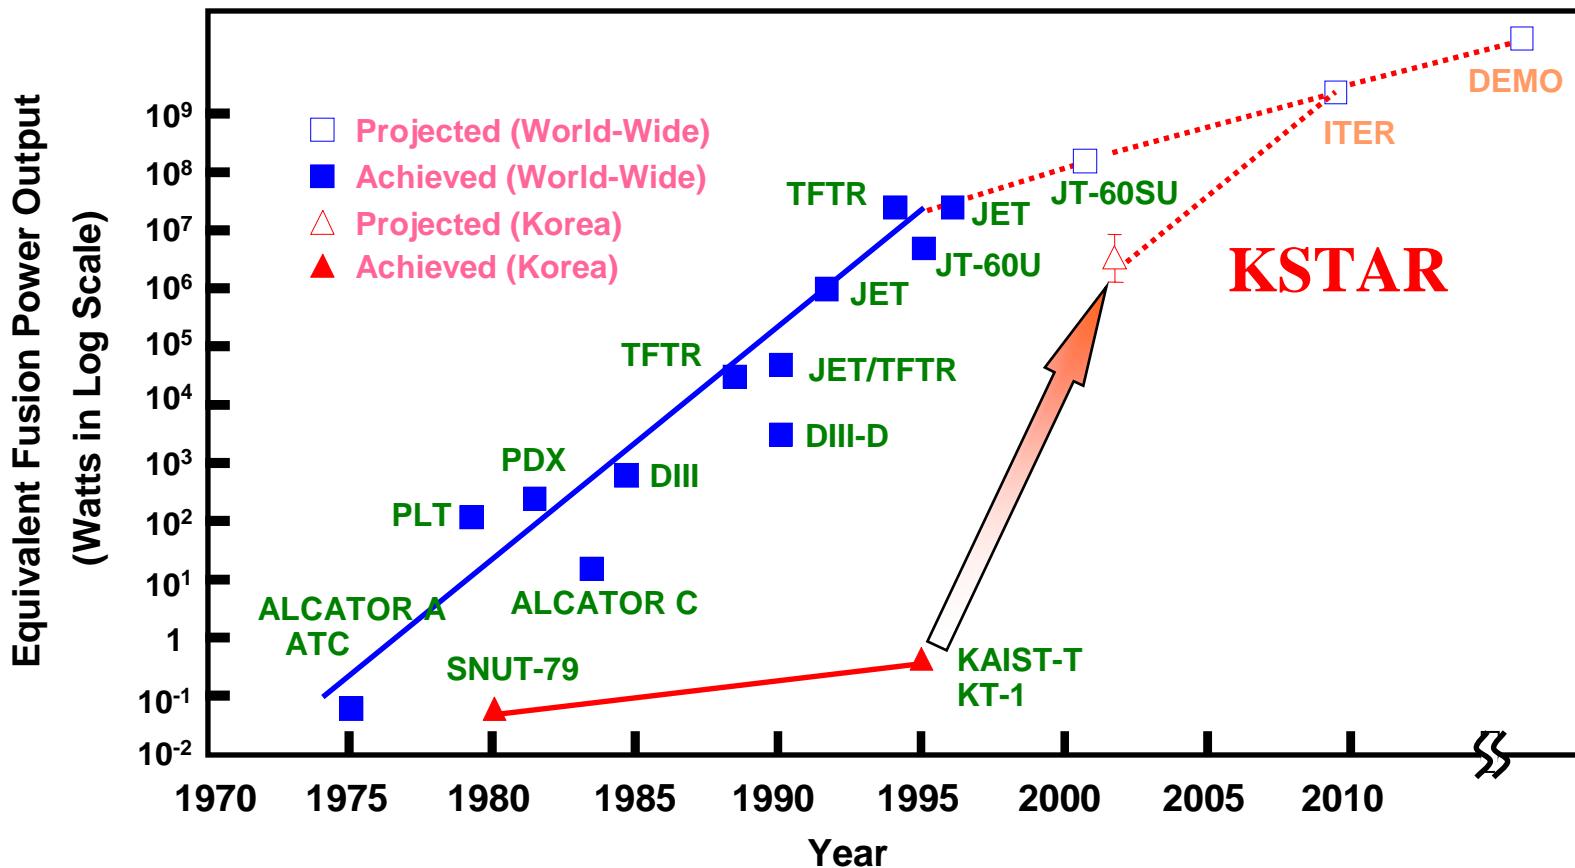

National users' facility

- Long-pulse tokamak plasma research
- Heating and current drive for steady-state operation

Project Period: Jan. 1996 - Dec. 2005

First Plasmas: June 2006 (Plan)

Construction & Operation: Korea Basic Science Institute (KBSI)

KSTAR Facility Construction Completed

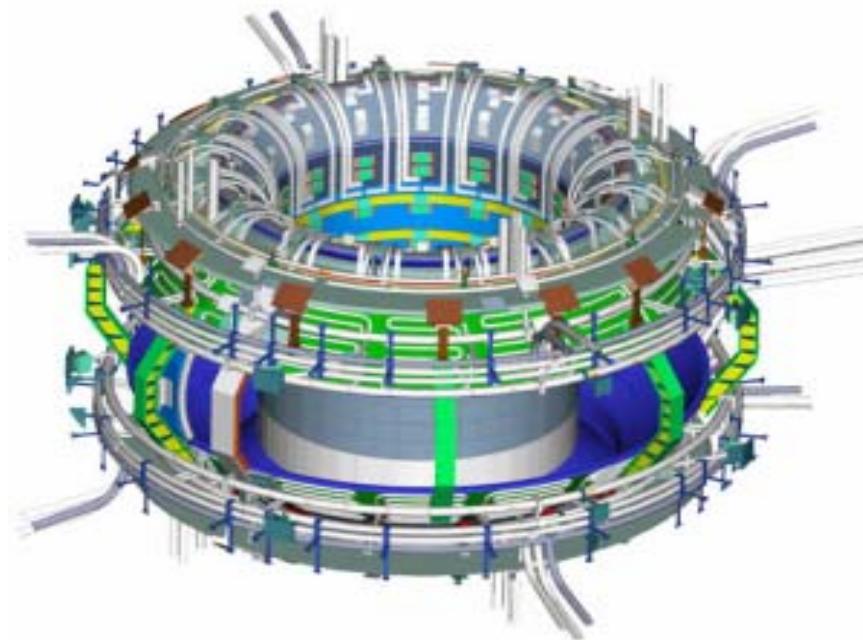

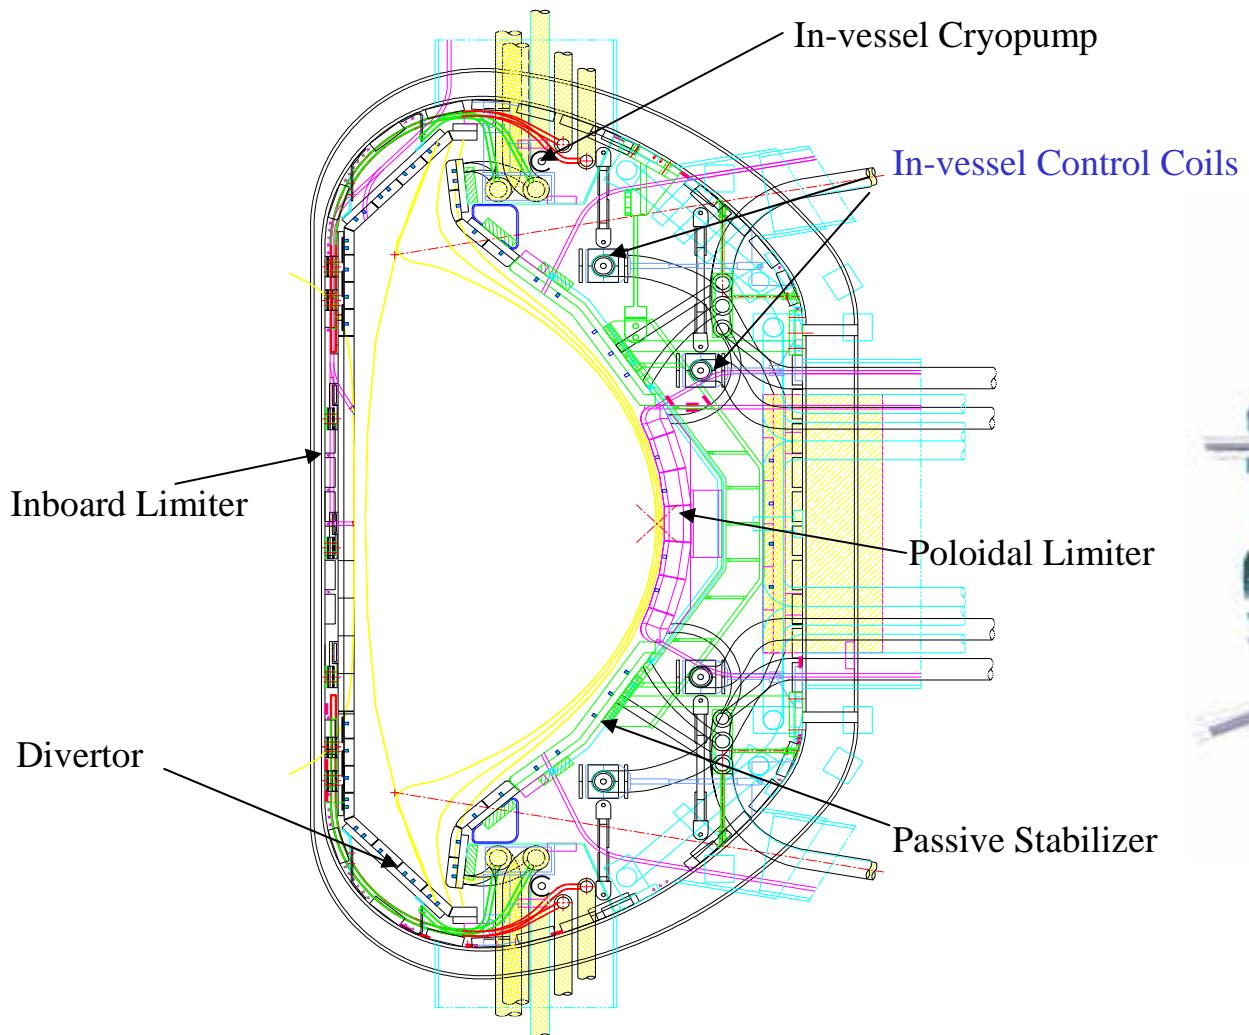

June 2002

KSTAR Experimental Hall Completed

KSTAR In-Vessel Components

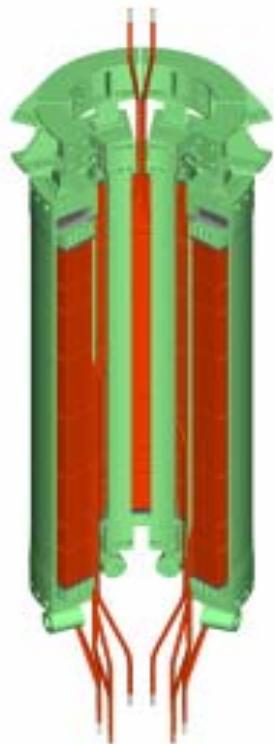

KSTAR Vacuum Vessel Fabrication

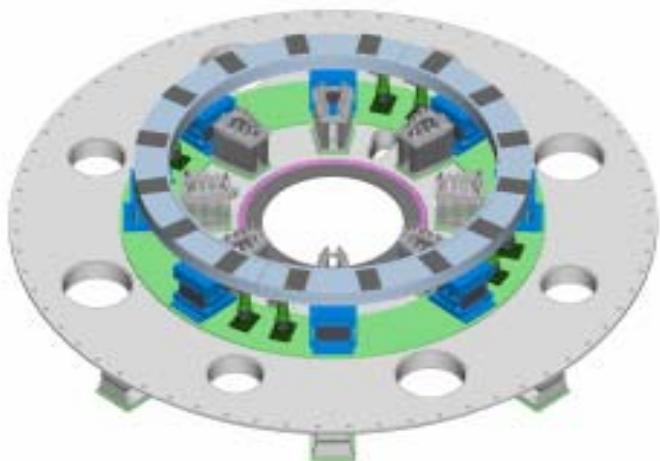

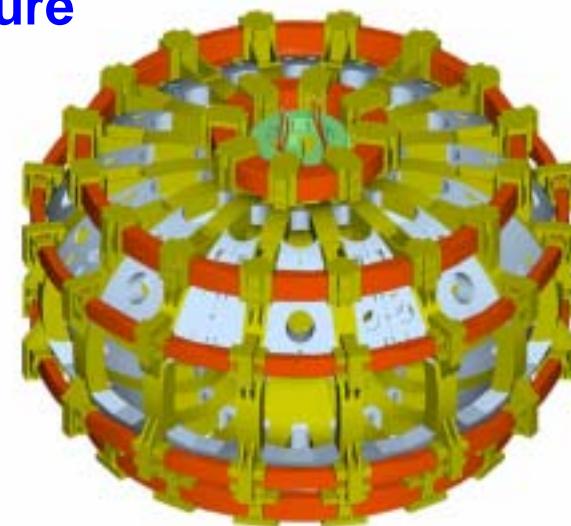

KSTAR SC Magnet Structure

CS Structure

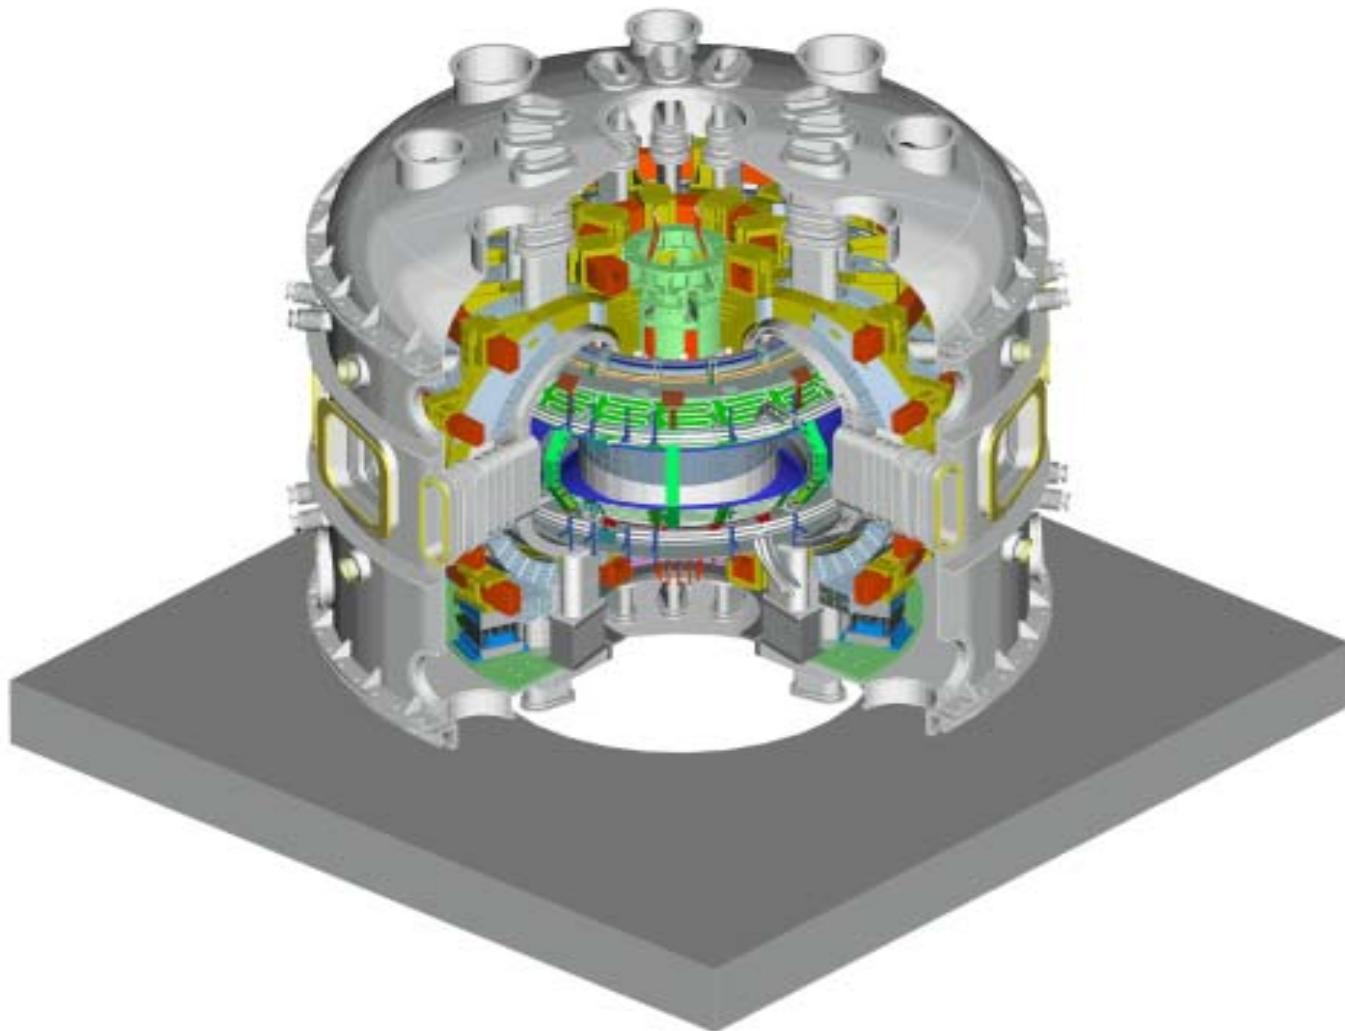

TF Structure

Gravity Support

KSTAR Tokamak

Presidential Visit to Washington (2003. 5. 14)

(ITER)

Joint Statement Between the United States of America and the Republic of Korea - Common Values, Principles, and Strategy

On May 14, 2003, President George W. Bush of the United States of America and President Roh Moo-hyun of the Republic of Korea held a summit meeting at the White House in Washington, D.C.

President Bush and President Roh highlighted the importance of increasing bilateral cooperation across a broad range of global issues. In this context, the two leaders welcomed U.S. and ROK cooperation in the International Thermonuclear Experimental Reactor (ITER) project, ...

KOMAC Overview

High-Power Proton Accelerator

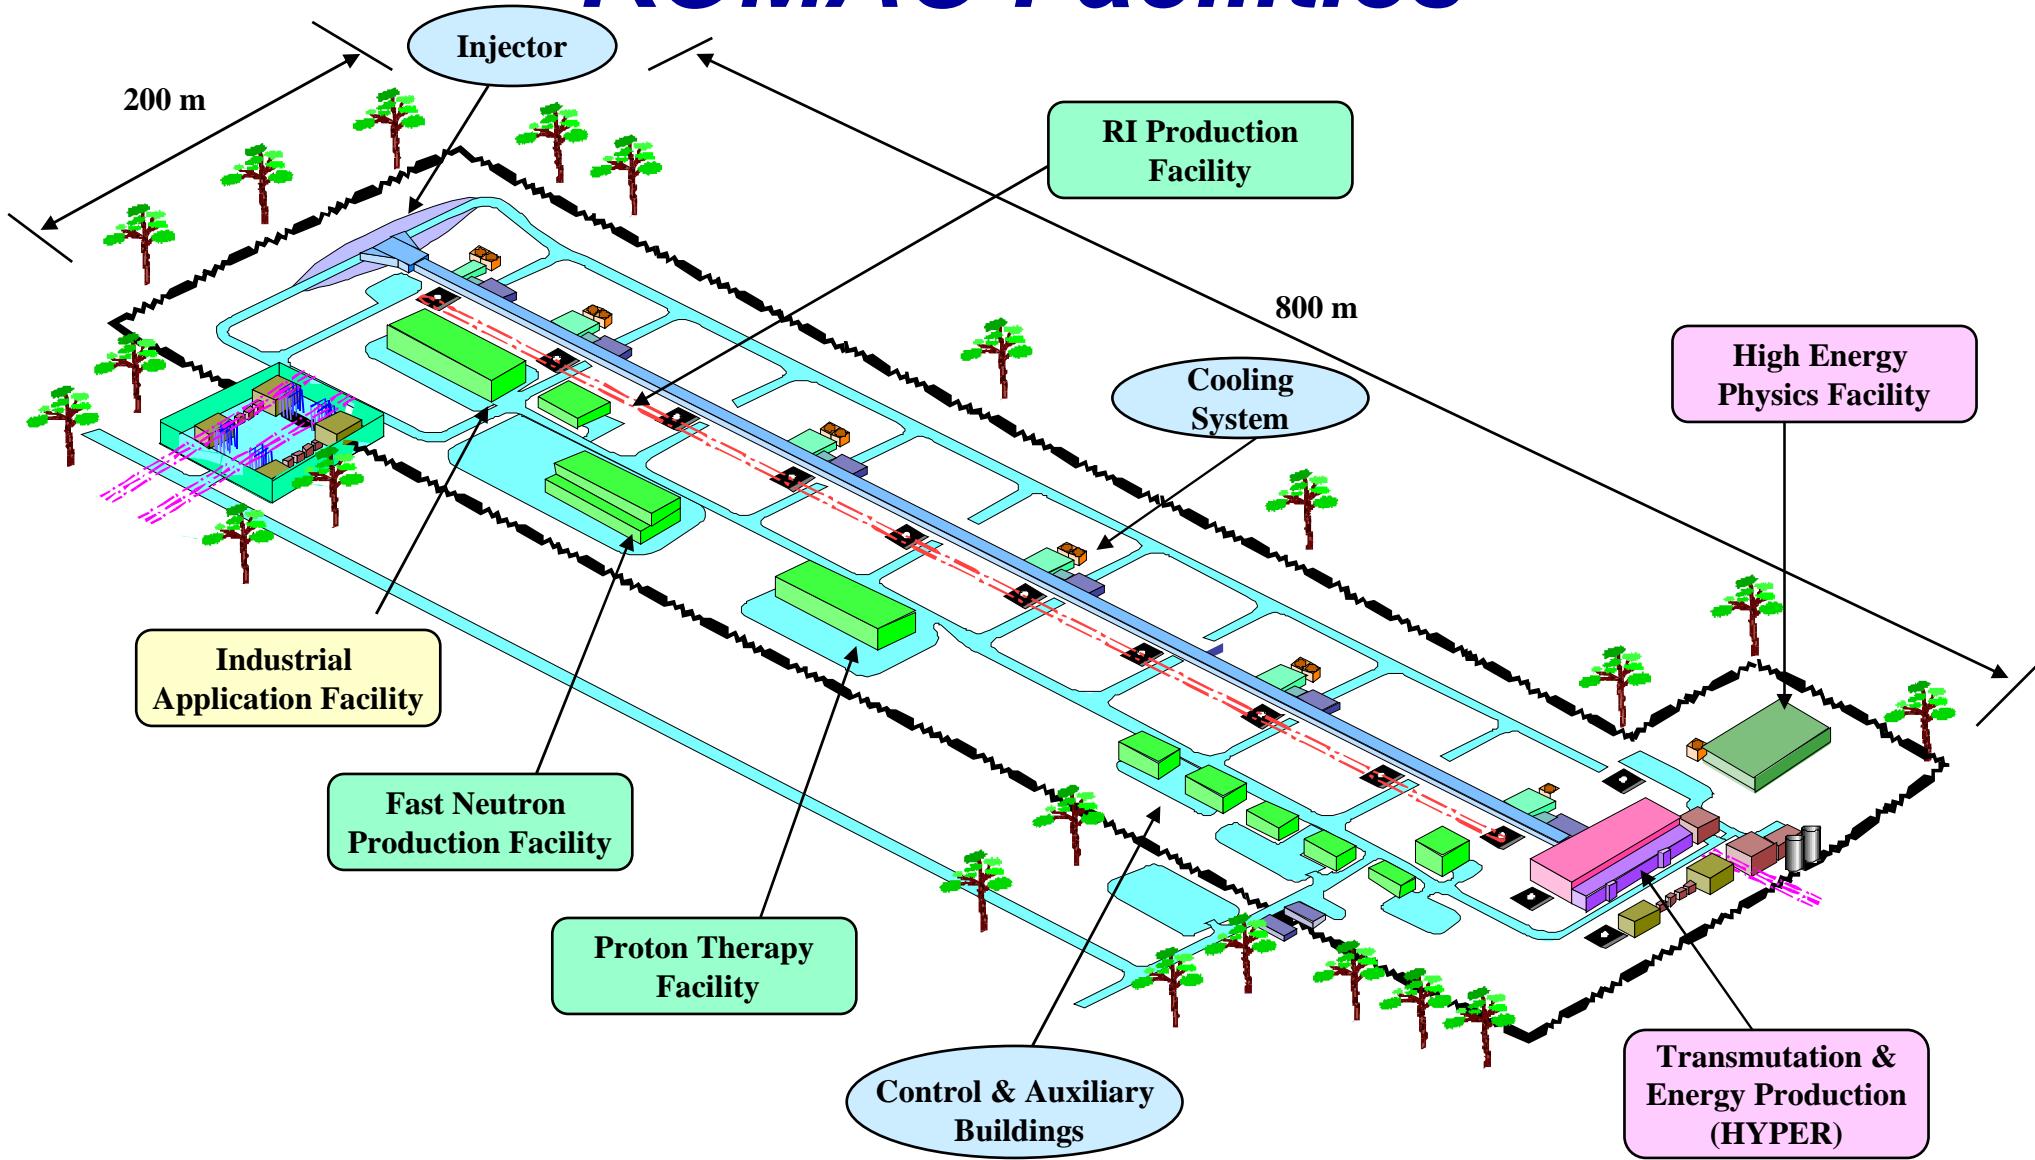

- o Staged construction of 1.0 GeV, 20 mA proton linac
 - 20 MeV: National Nuclear R&D Program (1997-2002)
 - 100 MeV: New Frontier Program (2002-2008)
 - 1.0 GeV: Under R&D Study

National users' facility

- o Intense neutron source for basic and applied science research

Lead Laboratory: Korea Atomic Energy Research Institute (KAERI)

Schematic Layout of KOMAC Facilities

Annual R&D Budget in Korea

	'95	'96	'97	'98	'99	'00	'01	'02	'03
Gov. R&D (Trillion Won)	1.8	2.4	2.9	3.1	3.1	3.5	4.5	5.2	5.5
Gov. Budget (Trillion Won)	51	58	64	76	83	87	100	106	111
GDP (Trillion Won)	377	418	453	444	484	518	544	N/A	N/A
GDP (Billion U\$)	490	523	482	317	407	457	421	N/A	N/A
GDP per capita (U\$)	10,900	11,400	10,500	6,900	8,700	9,628	8,957	N/A	N/A

*Note: Currency Ratio: 1 U\$ ~ 800 Won until 1997
~ 1,200 Won after 1998*

Basic Science & Strategic Technology Budget in Korea

	(Billion Won)				(Billion Won)
	'01	'02	'03		
Basic Science	737	941	1,035		
6-Techologies (IT, BT, NT, ET, ST, CT)	1,085	1,483	1,633		
R&D Budget	4,485	5,158	5,524		

IT	492
BT	496
NT	197
ET	251
ST	184
CT	14

*Note: Currency Ratio: 1 U\$ ~ 800 Won until 1997
~ 1,200 Won after 1998*

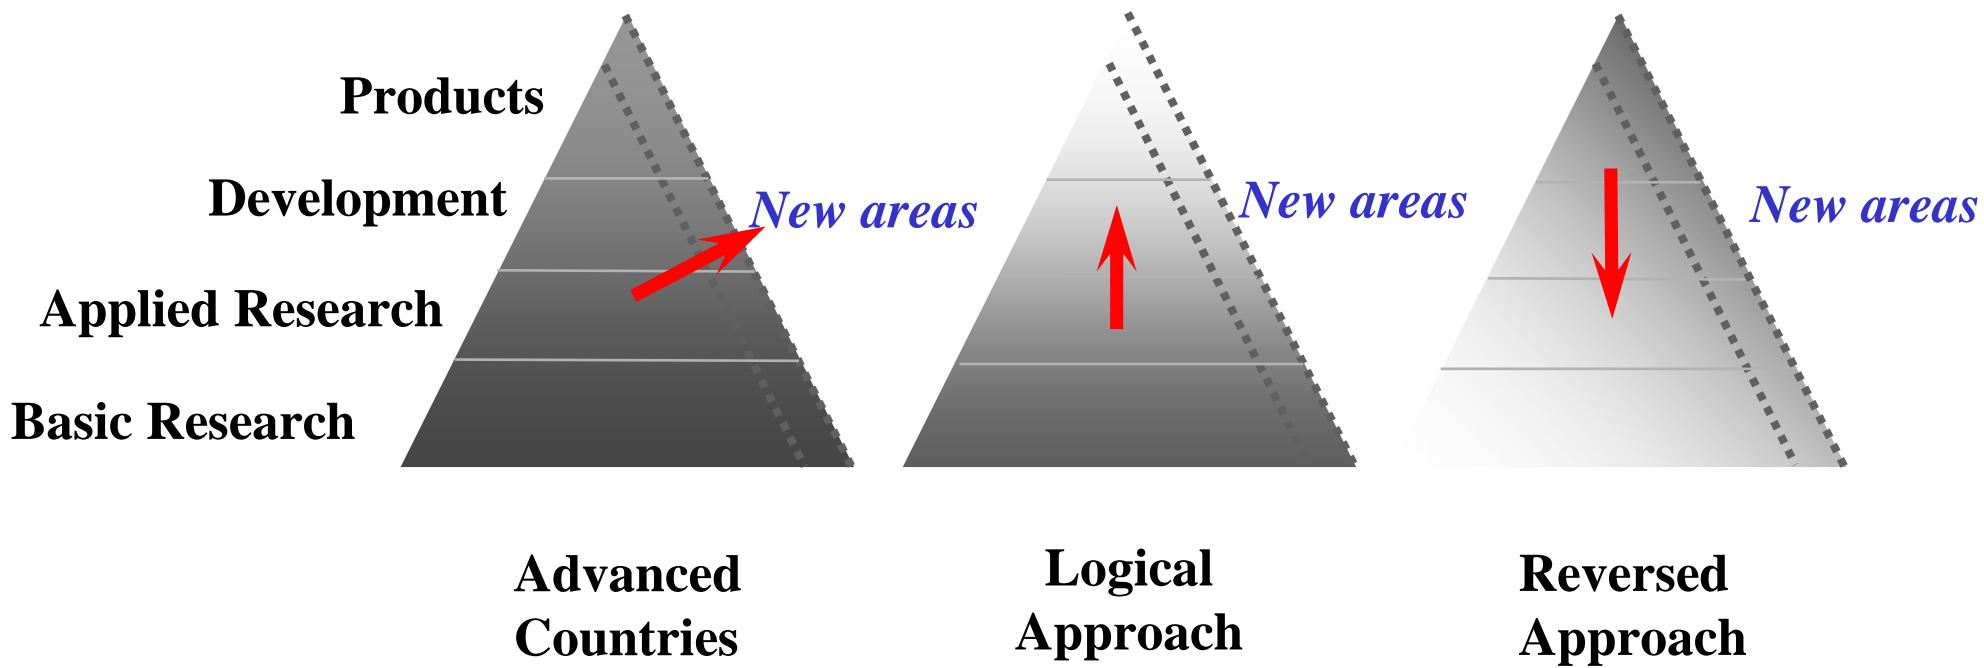

Large-scale Facility Budget in Korea

	(Billion Won)		
	'01	'02	'03
Basic Science	737	941	1,035
R&D Budget	4,485	5,158	5,524

*Note: Currency Ratio: 1 U\$ ~ 800 Won until 1997
~ 1,200 Won after 1998*

<i>2003 budget (Billion Won)</i>
PLS (Light Source) 22
KOMAC (Proton Linac) ~12
KSTAR (Tokamak) 45
Hanaro (Res. Reactor) ~15
